### Now available in North America, the first and only grooved system solution designed for CPVC Pipe

**EASTON, Pa. – August 11, 2017** – Victaulic's [System Solution for CPVC Pipe](#) is now available in North America. This innovative system is the first and only grooved solution designed specifically for use on Schedules 40 and 80 chlorinated polyvinyl chloride / polyvinyl chloride (CPVC / PVC) pipe. The System Solution for CPVC Pipe also introduces Victaulic's new PGS-300 groove profile to optimize product performance and provide a rigid mechanical joint.

The system includes the [Style 357 Installation-Ready™ Rigid Coupling](#), the [Style 356 Installation-Ready™ Transition Coupling](#), the [Style 358 Reducing Coupling](#), [PGS-300 Grooved End Fittings](#) and the [CG1100 Cut Grooving Tool](#).

This new system eliminates the need to join CPVC / PVC pipe using the traditional solvent cement joining method. Solvent cement cannot be corrected, retrofitted or maintained easily, and poses numerous risks to contractors including long cure times, the need for restraining equipment and potential chemical health concerns. By using a mechanical joint, the Victaulic solution is now the fastest, cleanest method to install CPVC / PVC pipe.

### About Victaulic

Since 1919, Victaulic's pipe joining and flow control solutions have optimized construction productivity and reduced risk, ensuring projects are completed safely, on time and within budget. Driven by a spirit of continuous innovation, Victaulic's portfolio of 100,000+ products and patented technologies promote freedom of design, as well as simplified inspection and maintenance for the life of any system.

With more than 3,500 employees and 40 international facilities, Victaulic helps customers in over 120 countries succeed in the global construction industry. From the tallest buildings to the deepest mines, customers trust our products to increase overall system durability in the most demanding construction projects and operating conditions.
