Victaulic expands its grooved product line for saturated steam systems in North America

EASTON, Pa. – September 18, 2017 – Victaulic is expanding its System Solution for Saturated Steam to include the [Series 871 Gate Valve](#) and the [Series 159 Flexible Loop](#). Victaulic's System Solution for Saturated Steam is the industry's first comprehensive grooved mechanical piping system for use on commercial and industrial condensate, saturated steam and chemical service piping, and eliminates the need to weld steam and chemical service piping.

The Series 871 Gate Valve is a flexible wedge, metal-seated valve that can be mounted in both vertical and horizontal runs. It installs in minutes and does not require certified welders to install, offering facility ownership rapid installation and easy maintenance that meets all required technical specifications. Using the Victaulic proprietary OGS-200 groove profile, the valve also minimizes the risk of improper assembly and eases installation.

The Series 159 Flexible Loop for Steam is made from 300 series stainless steel and accommodates movement caused by thermal changes, seismic activity and differential building settlement in all three planes. Compared to traditional welding of steam pipe, the flexible loop provides a smaller footprint and requires significantly lower force to deflect.

The new additions to the System Solution for Saturated Steam line will provide engineers, contractors and managers in the field with access to the benefits of grooved mechanical pipe joining including reduced labor costs, compressed schedules, increased safety and ease of maintenance.

About Victaulic

Since 1919, Victaulic's pipe joining and flow control solutions have optimized construction productivity and reduced risk, ensuring projects are completed safely, on time and within budget. Driven by a spirit of continuous innovation, Victaulic's portfolio of 100,000+ products and patented technologies promote freedom of design, as well as simplified inspection and maintenance for the life of any system.

With more than 3,500 employees and 40 international facilities, Victaulic helps customers in over 120 countries succeed in the global construction industry. From the tallest buildings to the deepest mines, customers trust our products to increase overall system durability in the most demanding construction projects and operating conditions. Learn more about how our innovative piping products and design services can engineer confidence into your build at www.victaulic.com.
